SUBJECT: 30-Day Substitute Credentials

Thirty-day emergency substitute credentials dated to be effective on or after 7-1-77 will cover both multiple subject and single subject levels. The broader authorization will be designated, even if the statement of need requests a particular level.

Those credentials which may already have been issued will not reflect this change and will not be altered. Those applications not yet processed will be issued for service on both levels. If two applications have been submitted and are not yet processed, one application and fee will be returned for the future use of the applicant.

If you have special questions regarding the 30-day substitute credential, please contact Information Services at (916) 445-7254.
